EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Eric W. Petraske (RN: 28,459) on November 17, 2004, and with Todd Li (RN: 45,554) on November 24, 2004

The application has been amended as follows:

IN THE CLAIMS

Claims 14-20 are canceled.

In claim 1, line 14, delete the term of "outside said transistor body and".

Allowable Subject Matter

Claims 1-13 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Prior art does not teach or render obvious a method for forming an N-type transistor as defined in the above allowed claims, comprising particularly the steps of: forming a pair of temporary

Art Unit: 2811

dielectric spacers on the sides of the gate electrode; removing a portion of a strained silicon layer outside the transistor body and below the pair of temporary spacers by a substantially non-directional process, which naturally forms an undercut beneath the temporally spacers, leaving a buffer portion of strained silicon in the strained silicon layer and forming a first S/D aperture outside the buffer portion; forming an electrode layer of silicon in the first S/D aperture, making mechanical and electrical contact with the transistor body and with a portion of an underlying SiGe support layer; forming transition doped areas between the transistor body and electrode areas in the electrode layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References A-H are cited as being related to a method for forming a transistor structure involving spacers.
